Washington, D.C. 20515

The Honorable Frank Pallone
Committee on Energy & Commerce
2125 Rayburn House Office Building
Washington, D.C. 20515

Dear Chairman Upton and Ranking Member Pallone,

The purpose of this letter is to support the important breast cancer legislation currently pending before your Committee. H.R. 1197, Accelerating the End of Breast Cancer Act, is a bipartisan bill with over 270 co-sponsors, which include more than 60% of the Members of the Energy & Commerce Committee.

As you know, breast cancer is the second-leading cause of death among women in the U.S. This issue is personal to us and thousands of other Granite Staters, who have friends or family suffering from breast cancer, or who suffer from it themselves.

H.R. 1197 focuses on identifying strategies for the primary prevention of breast cancer, and preventing metastasis, which is responsible for over 90% of breast cancer deaths. The legislation creates a 10-person commission, which includes representatives of biomedical research, business, breast cancer advocacy, and other disciplines, who have demonstrated an ability to be innovative.

The commission would be tasked with identifying existing opportunities, tools, technologies and ideas that are not currently being prioritized by the public and private sectors, but which hold true promise in ending breast cancer. The bill leverages existing research and technologies to help end breast cancer. The commission would not duplicate the efforts of other government agencies and programs, but instead would help ensure our nation's limited research dollars are leveraged to accelerate current progress.

H.R. 1197 is a bipartisan approach to accelerating the progress already made towards ending breast cancer. We urge you to give full and fair consideration to this worthy piece of legislation. While we have made great strides in research and treatment, it is clear that more work is required. As the Chairman, we request that you bring H.R. 1197 to the Energy and Commerce Committee for its full consideration.

Sincerely,

Frank Guinta
Member of Congress
